

To whom it may concern,

African Nurseries (Pty) Ltd is registered under the Plant Improvement legislation, as appointed by the Department of Agriculture, to produce all our materials to the highest quality standards. Our production processes strictly adhere to the conditions set by the South African Plant Association scheme and the Plant Improvement Act. We are subject to annual audits by the Directorate of Plant Protection from the Department of Agriculture to ensure compliance with the Act.

We confirm that the plant material we supply to our organic customers is untreated and not derived from genetically modified organisms (GMOs) or GMO-compounded products. Therefore, the vine material used in our grafting and production processes is GMO-free.

To the best of our knowledge, there are currently no organically produced and certified grapevines (including table, wine, and raisins) available from nurseries within South Africa. Additionally, we ensure that only healthy vines are supplied to support our customers' organic practices.

Kind regards,

JH van der Merwe
Director African Nurseries (Pty) Ltd
